

Department of Computer Science

About BCA

The fundamental objective of the Department is to provide opportunities for our students to develop a firm foundation in computers, mathematics and design methodology applied to the disciplines of the Computer Science. Our course covers all fundamentals, working and advanced concepts that provide a learning environment where students understand and are able to apply the most contemporary and essential tools needed for the in depth knowledge of computer science.

Duration of the Course

Three Years (6 Semesters)

Eligibility for BCA

Students seeking admission to the Bachelor of Computer Application (BCA) program should have passed 10+2 examination or equivalent with 45% marks (40% marks in case of SC/ST categories) from any recognized Board or Council in any discipline and Mathematics as one of the subjects in 10+2 (Intermediate) Examination. Students who have fulfilled these conditions will be considered to have met the BCA eligibility criteria.

Seats

140 Seats

Placement

Students of Computer Science Department are getting placement in various I.T Companies, Government and Non Government sectors, Academicals, and other Industries through placement cell of our institute.

Course Content

The BCA course syllabus approved by MJPRU University has been formulated by eminent members of the IT industry. It has been structured in a way that will benefit the student so as to let him/her get a grip on the basic to the advance modules taught in the semesters.
